Experience

[Geriatric Care Solution](#) / Full Stack Web Developer

Jan 2024 - May 2024, California, United States (Remote)

- Executed complete redesigns of existing websites, enhancing navigation, visuals, and search engine rankings with Next.js.
- Implemented eCommerce feature allowing customers to receive free materials by mail, integrating Stripe for payment processing.
- Utilized Twilio for SMS alert messaging and Resend for emailing.

[Build My Wealth](#) / Lead Mobile Developer & Co-Founder

Jan 2022 - Present, Las Piñas, Philippines (Remote)

- Co-founder and lead mobile developer at "Build My Wealth," a startup focused on empowering users through financial management.
- Developed using React Native, specifically utilizing the Expo framework to streamline deployment and testing.
- Integrated RxDB for robust local data management, enabling seamless offline functionality and synchronization with server-side systems.

[Creating Info](#) / Mobile Developer

Oct 2023 - Apr 2024, Ortigas Center, Pasig, Philippines (Remote)

- Developed a mobile application on a contractual basis, delivering high-quality software solutions within the agreed timeframe.
- Implemented an offline-first application where data is synced from the server to the local database on the mobile device. The data and its images are cached and available offline.

Vashcorp Inc. / Front End Web Developer

Jan 2023 - July 2023, Cubao, Quezon City, Philippines (Remote)

- Developed two websites using Next.js, focusing on the latest web technologies and best practices.
- Created a survey website and a real estate website, applied modern development techniques to ensure high performance, user-friendly interfaces, and scalable architecture for both projects.

Freelance / Web and Mobile Developer

Sept 2021 - Oct 2022, Iligan City, Philippines

- Developed full-stack websites and a mobile application for bachelor's and master's students to facilitate their thesis projects.
- Developed the front-end of a website with a dedicated accounting system for handling cryptocurrency transactions.
- Created a front-end website focused on analytics for TikTok statistics.

Sunnyside / Mobile Developer

Feb 2021 - Jun 2021, Iligan City, Philippines (Remote)

- Developed two applications from scratch using React Native, employing the latest technologies and best practices.
- Collaborated in a two-person team to design and implement a financial application and a warehouse inventory management system.
